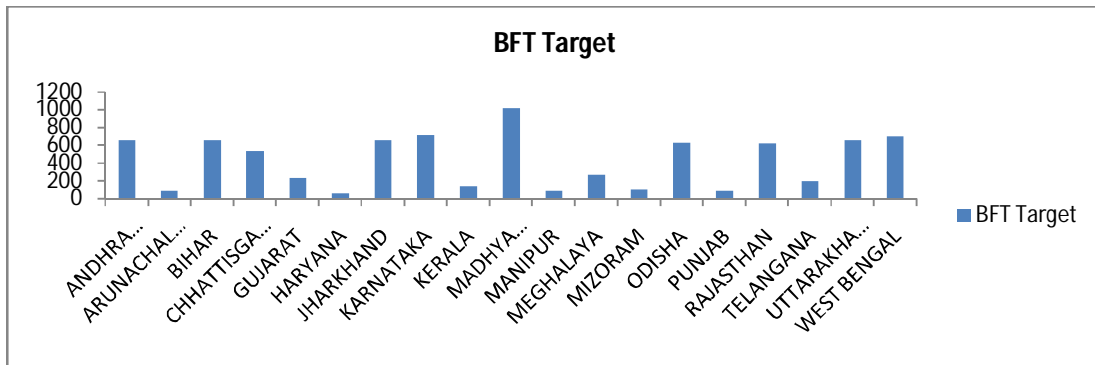

Figure 1: BFT Target by State

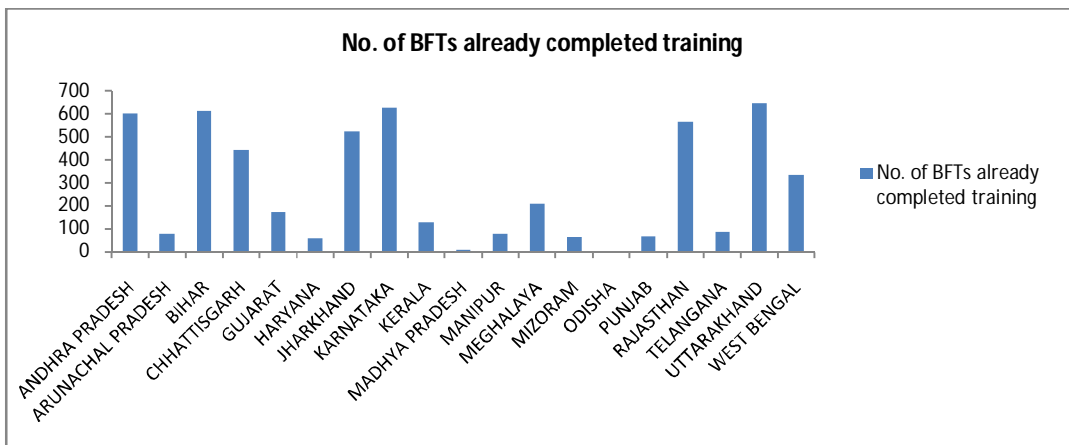

Figure 2: No. of BFTs already completed training by State

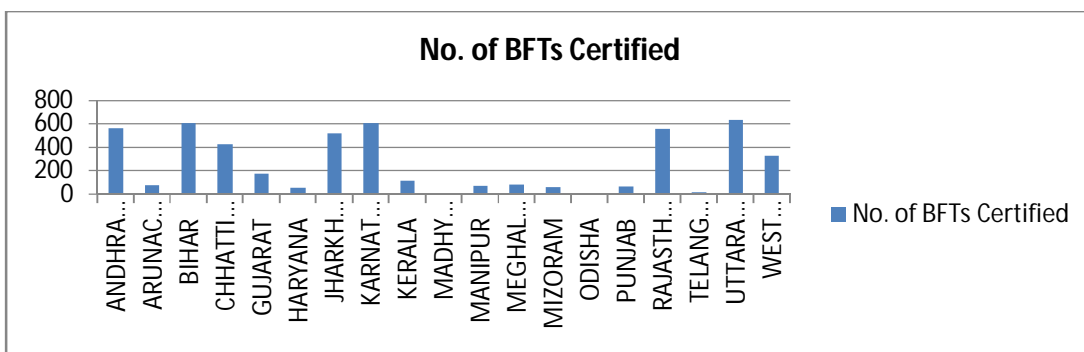

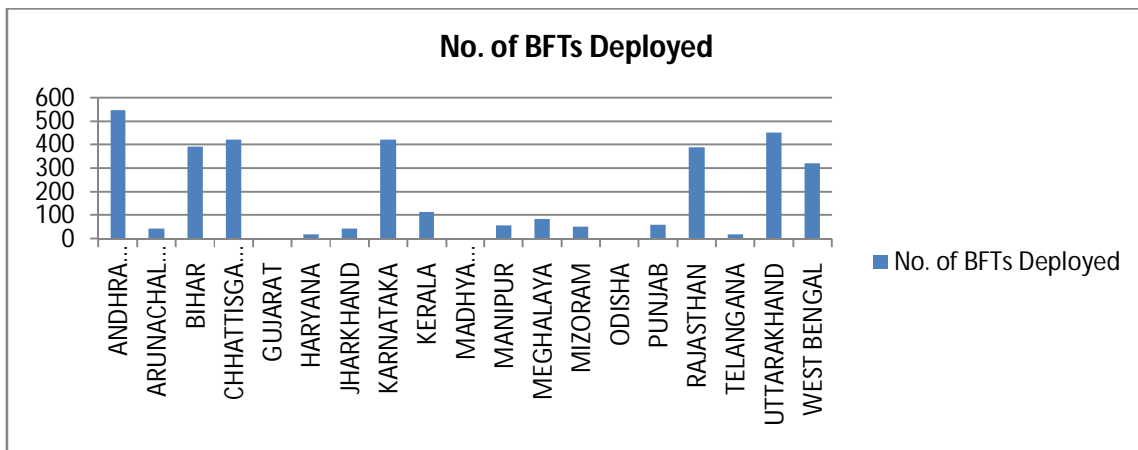

Figure 3: No. of BFTs Certified by State

Abstract: This study examines the impact of BFT training on rural development in India. The research focuses on the number of BFTs trained, completed, and certified across various states. The findings indicate that while the target number of BFTs varies significantly by state, the actual number of completed trainings and certifications is also high, particularly in West Bengal and Punjab. The study highlights the need for continued support and resources to achieve the BFT targets and maximize their impact on rural development.

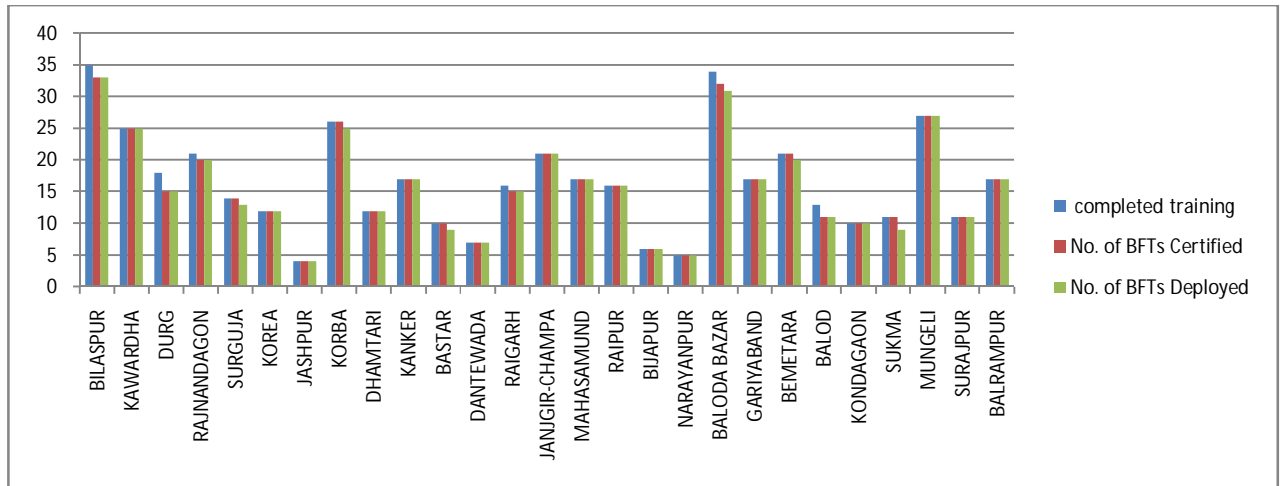

Figure 1: District-wise number of completed training, certified BFTs and deployed BFTs

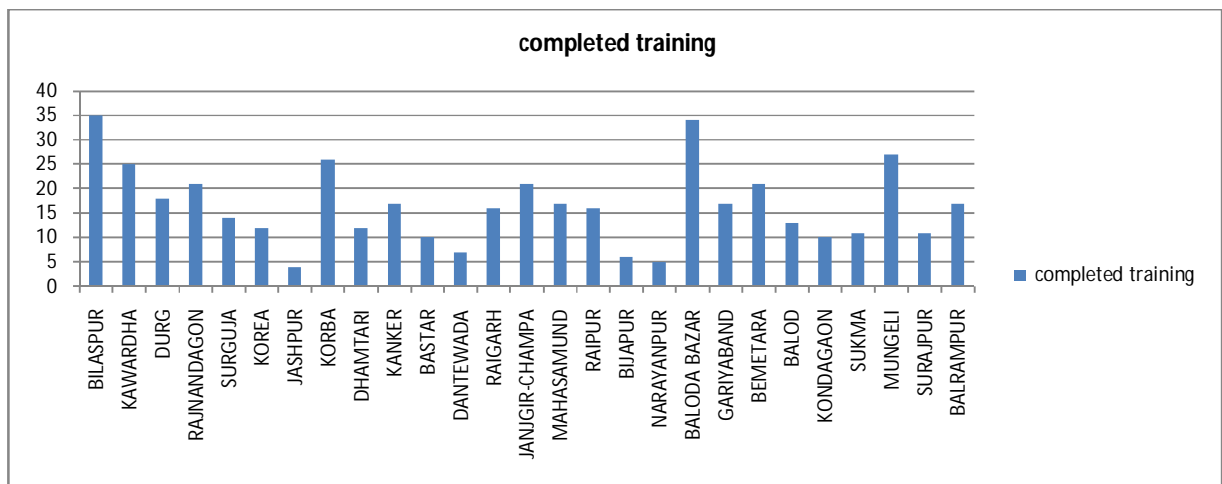

Figure 2: District-wise number of completed training

Abstract: This study aims to assess the impact of training on the performance of BFTs in different districts. The study was conducted in 25 districts of Chhattisgarh. The results show that the number of completed training, certified BFTs, and deployed BFTs varies significantly across districts. The highest number of completed training was observed in Bilaspur (35), followed by Baloda Bazar (34) and Korba (26). The highest number of certified BFTs was observed in Bilaspur (33), followed by Baloda Bazar (32) and Korba (25). The highest number of deployed BFTs was observed in Bilaspur (32), followed by Baloda Bazar (31) and Korba (25). The study concludes that training is an important factor for the performance of BFTs and should be given more emphasis in districts with low training completion.
